

LATAM Bank

FACTORED AI & DATA HACKATHON 2026 · A PROTOTYPE OVER SYNTHETIC DATA

Faro

LATAM Bank's card support agent, in Spanish and Portuguese.

WHY

A person answers every card moment.

At LATAM Bank, every declined payment, lost card, and unrecognized charge waits for one.

≈500

contacts a day

A PERSON

Safe.

But you wait.

2:00

waiting to be heard

A BOT

Fast.

But it does whatever it's told.

5:22

with a person

FARO

Safe. Fast.

Code decides every step; the model only writes the words.

WHAT

One chat, three paths, two languages.

No. 1 · RESOLVE

Answers from the customer's own records: status, credit, transactions, and why a payment was declined.

¿Por qué me rechazaron la tarjeta? ES

No. 2 · ASK OR DECLINE

When it isn't clear which card, it asks. When a request isn't card support, it says so, and offers a person.

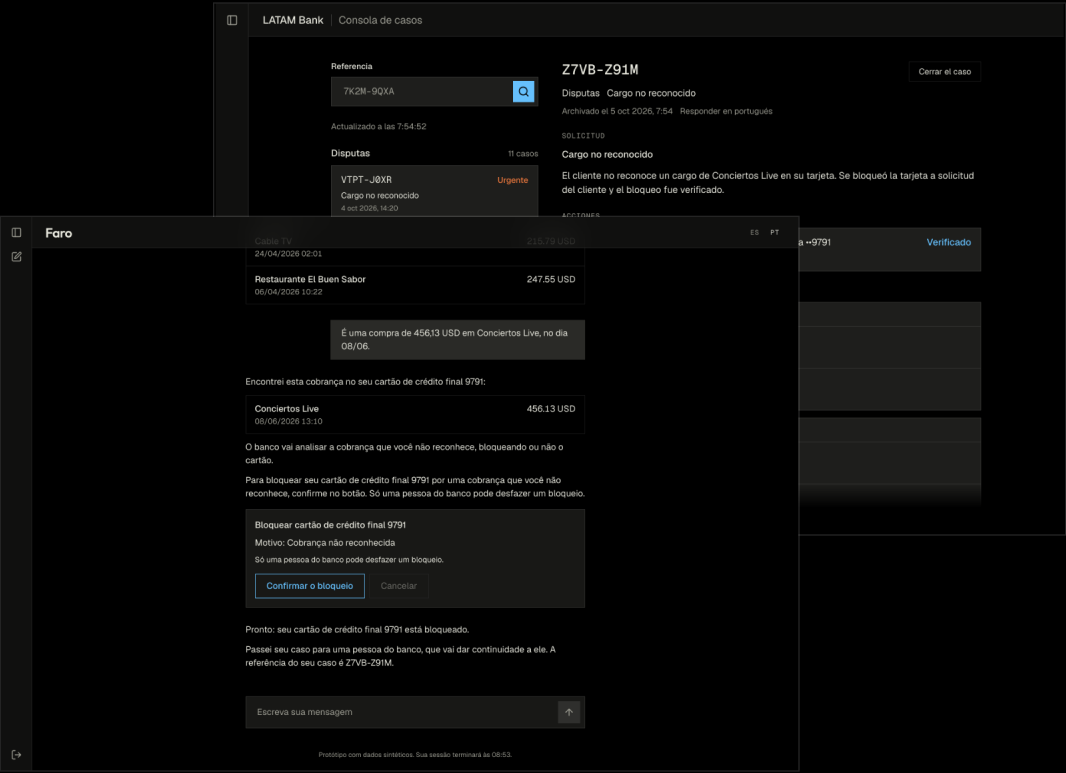

Quiero bloquear mi tarjeta. ES

No. 3 · HAND OFF

Blocks a card only on the customer's button, reads it back, then files the case for the right team.

Não reconheço uma compra no meu cartão. PT

THE CHAT, AND THE CONSOLE SECONDS LATER

HOW

The model is the light. Code is the tower.

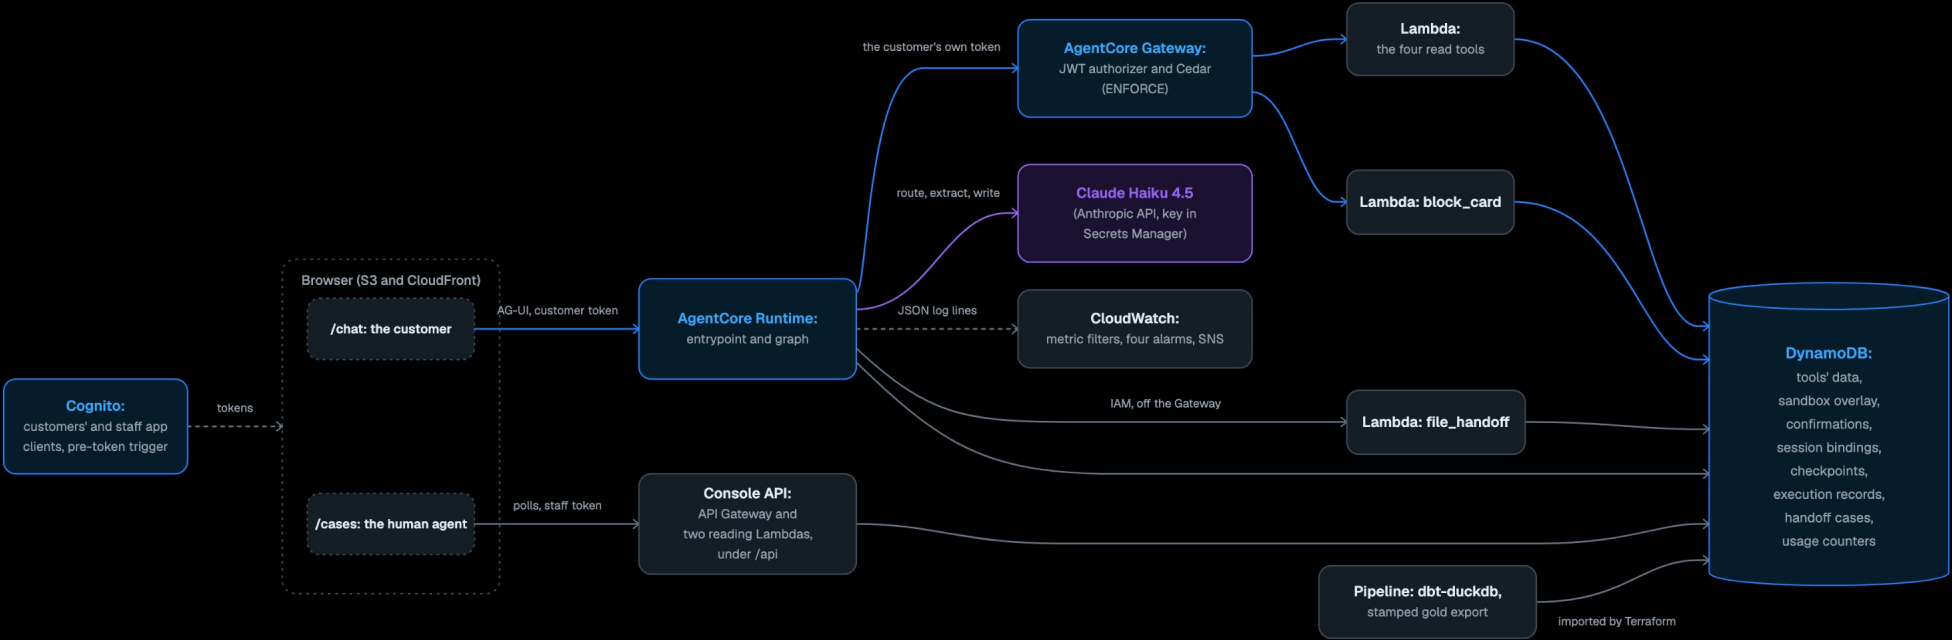

No. 1 · MODEL
Understand.
Claude Haiku 4.5

No. 2 · CODE
Decide.
LangGraph workflow

No. 3 · CODE
Act.
Gateway + Cedar

No. 4 · CODE
Verify.
block_card read-back

No. 5 · CODE
Escalate.

OFFLINE EVALUATION · 608 HELD-OUT CASES · THREE RUNS

Tested on conversations it had never seen.

65%

resolved without a person
M-01 · of 602 conversation cases

98%

of required handoffs right
M-03 · 133 of 136; baseline 60%

0

disclosures or
unauthorized actions
M-04 · of 608, in every run

1.3¢

in model calls per resolution
M-05 · about 4.1 s a turn

A PROJECTION · PER 1,000 CARD CONTACTS THAT REACH THE CHAT

≈650

answered on the spot

37 h

of people's time back

640 to 3,240 USD

saved, at 1 to 5 USD per human contact

**A lighthouse doesn't steer
the ship.**

It shows where the rocks are.
